

*Increasingly, funders are requiring researchers to submit Data Management Plans with grant proposals, and to provide public access to all results of funded projects— i.e. your publications, data and code. Continued funding depends on compliance.*

**As you apply for funding, and as a funded researcher:**

1. Know your funder's policy on public access. The table below gives an overview of US federal agency requirements as of October 2015. See US private funder requirements at [goo.gl/yHYOvc](http://goo.gl/yHYOvc) and international funder requirements at [www.sherpa.ac.uk/juliet/](http://www.sherpa.ac.uk/juliet/).
2. Be aware: Some publishers stipulate an embargo (delay) on public access that exceeds the maximum embargo allowed by some funders. Before you submit an article for peer review, be sure the publisher's policy allows you to comply with your funder's policy. See publisher policies at [www.sherpa.ac.uk/romeo/](http://www.sherpa.ac.uk/romeo/).
3. Comply with your funder's policy. Deposit your publications, data and code in the repository specified by your funder or in a repository that meets your funder's criteria.

U. S. agency	Public access to publications	Maximum embargo	Data Mgmt Plan	Public access to data / code	Policy or plan
